A close-up, low-angle shot of a waterfall cascading over rocks, with water droplets frozen in mid-air, creating a bokeh effect of bright white spots against a deep blue background.

Boilers Plumbing Solar Heating

A Division of Faisal Jassim Group

About Us

Heatech division is an integral part of Faisal Jassim Group, providing turnkey solutions for the water heating and plumbing systems. We are partnered with globally renowned brands, who are the pioneers in this field and are capable of providing customized engineering solutions for residential, commercial and industrial water heating and plumbing applications.

Why Choose Us

Heatech is a turnkey solutions provider. We support our clients with design, supply, installation, testing, commissioning, training and after-sales services.

- Expertise solutions in selection and sizing of equipment based on applications.
- Bespoke designs for unique requirements.
- Highly trained and experienced technicians for efficient after sales services.
- Extensive list of installations across GCC conforms the product quality, reliability and competitive pricing.

Our Brands

Radiant - A high end product for solar water heating solutions.

- More than 40 years of experience, continuously upgraded technology, creativity, flexibility, and technical know-how have granted RADIANT an innovative strength in manufacturing.
- Thermosyphonic and forced systems to cater to all type of solar heating applications for villas, residential and commercial buildings.
- Domestic and Commercial Calorifiers.
- Comply with Estidama (sustainability) requirements conceived by Abu Dhabi Urban Planning Council and to the criteria and specifications framed for Green Buildings by Dubai Municipality.
- International approvals and certifications such as KEY MARK/TUV/EN12975.

French specialist of Solar Energy for over 40 years, GIORDANO Industries work to provide the people in various parts of the world, the energy of their welfare. GIORDANO Industries factory in Aubagne (France) markets worldwide individual or collective solutions for hot water and heating and solar electricity from renewable sources.

- It manufactures a unique range of solar collectors and water heaters. The range of systems varies from self contained solar domestic water heaters for households and villas to large capacity systems for collective facility such as hotels, hospitals and office buildings.
- Its products are aimed at a clientele of private individuals but also of public and private contractors.
- For hot water and heating from renewable energy GIORDANO Industries designs, manufactures and markets innovative technologies, proven and specifically adapted to different geographical situations.

- GIORDANO Industries particularly well known associate solar systems and thermodynamics, providing facilities particularly high coefficients of performance.

For more than 60 years, Lacaze Energies is a specialist in the field of hot water production for domestic and heating applications and benefits from the combined experience of an industrial group.

- It offers solutions for energy optimization in the service and manufacturing sectors. Its expertise is acquired over the last 60 years in designing and building systems for producing domestic hot water (DHW), Low Temperature Hot Water (LTHW), as well as in Chilled Water storage for the service and manufacturing sectors.
- Developed as complete systems, each of the products integrates the best combination of components and materials to ensure 100% satisfaction in terms of performance, cost- effectiveness and reliability. Innovation is at the heart of the business.

LACAZE ENERGIES continues to develop and offer the most efficient materials in line with market demands, new thermal regulations (such as the RT2012) and environmental issues (Optimization of the production and consumption of hot water, technological developments linked to renewable energies, etc.) thereby together we offer best support to our stakeholders.

A special high performance epoxy resin (RC Coating) has been developed by Lacaze Energies, in collaboration with a leading European specialist in the field and is the only inner lining for industrial tanks in France to benefits from an A.C.S. (Health Conformity Attestation). It is a WRAS approved material (BS6920).

Dimplex North America Limited is the world leader in electric heating, offering a wide range of residential, commercial and industrial products. The company’s commitment to innovation has fostered outstanding product development and design excellence.

Dimplex heat pumps are being implemented in buildings in increasing numbers for heating and domestic hot water preparation. This is because the future belongs to environmentally-friendly heating systems. Heat pumps have extremely low operating costs because they draw the majority of the required energy from the environment and are not dependent on oil or gas for operation.

Water-to-water and air to water heat pumps extract the required heat from the tempered ground water, chiller or ambient air. A highly effective heat pump heating system can be achieved by Dimplex heat pumps.

GF JRG Piping System is a specialist in the distribution of cold and hot water in residential, industrial and commercial buildings, hospitals and hotels to remedy the problems of corrosion, scale, maintenance and installation difficulties in conventional plumbing. JRG has developed a system, which has revolutionized domestic water services.

- GF JRG: Cross linked polyethylene pipe-in-pipe system and gun metal valves and fittings.
- GF JRG MT: Multilayer system ideal for water distribution, riser for houses as well as for large buildings.
- Products are WRAS approved.

Honeywell Braukmann PRV’s and Valves Solutions. Honeywell Braukmann is a world leader in providing water control solutions for applications in domestic and commercial buildings. Honeywell valves are available in bronze, brass and cast iron construction of premium quality, are well known for accuracy and reliability.

The Power of Total Integration

Only Cleaver-Brooks can offer complete boiler systems, from fuel inlet to stack outlet that are completely designed, engineered, manufactured and integrated by one company. If you’re looking for the best-quality boiler systems with the lowest emissions and highest efficiencies, you’re looking for Cleaver-Brooks.

A Long-Standing Tradition

The company was founded in 1929 by John C. Cleaver, manufacturing small, portable boilers. Cleaver and Raymond Brooks formed Cleaver-Brooks in 1931 and began producing the world’s first packaged boiler. Through a commitment to research and development and a sound acquisition strategy, today the company is the sole provider of integrated boiler room solutions and is a leading manufacturer of boiler room equipment across all commercial, institutional and industrial markets.

Product Development

When you’re the industry leader, the only way to stay there is to continuously innovate and push the boundaries of what people think is possible. At our dedicated product development center, we continue to develop breakthrough emissions and efficiency technologies for tomorrow’s boilers and burners.

Cleaver Brooks the world’s leading manufacturer of packaged high pressure and low-pressure commercial and industrial boilers and boiler room systems, for applications ranging from process industries through hospitals and hotel sectors. Packaged boilers are approved by Underwriters Laboratory and are built to comply with Factory Mutual and ASME Boiler Code.

High efficiency low emission solutions for steam and hot water generation.

- Boilers: Fire Tube , Water Tube, Condensing and Electric
- Burners: Compatible for oil, gas and alternative fuels
- Controls: Compatible for all types of communications protocols
- Heat Recovery: For better efficiency and sustainability

CAMUS® Hydronics Ltd. is a manufacturer of an extensive line of gas fired high efficiency copper tube and stainless steel boilers for residential, light commercial, commercial and industrial applications. It operates out of a modern manufacturing facility complete with a state of the art testing lab, engineering department, manufacturing and assembly lines, warehouse and parts depot.

With over 75 years of collective experience, the CAMUS® design team of engineers, service and management staff is equipped to lead the way with innovative designs and leading edge technology.

CAMUS® Hydronics Ltd. is a service oriented company providing new and better solutions to the challenges and needs of our industry and marketplace.

Mitanox is situated in Turkey, and is a leading manufacturer in the region. Products include:

- Stainless Steel Flues/Chimney Pipes / Exhaust Systems (CE, MPA and TUV certified).
- Linen and Garbage Chute Systems
- Ventilation and Kitchen Ducts.

What Mitanox can also further provide your firm with:

- Technical Assistance from our professional Engineers team with AutoCad / Solidwork drawings for your mechanical projects.
- Calculations for an optimum diameter for Exhaust Flue for the Heating Appliance(s).
